

Swedavia Flight Volume Incentive¹

Swedavia offers passenger airlines a Flight Volume Incentive intended to promote utilization of existing infrastructure. The incentive helps airlines reduce costs on high-volume flights and encourages efficient use of airport capacity.

A discount of 25% will be applied on the Passenger Charge for any additional passenger above 160 passengers, calculated per flight. The Flight Volume Incentive is applied at all airports and does not have a time limitation in eligibility.

Departing Passengers per flight	Discount on Airport Passenger Charge
1 - 160	0 %
161 and above	25 %

The discount will be applied directly on the flight invoice and applied to destinations not already subject to New Destination Discount (NDD). Passengers qualifying for this incentive may also be counted towards other annual incentive programs (PIB, Transfer, Volume).

Rules and Regulations

The discount is adjusted on the invoice and applied on the passenger charge paid for the applicable Swedavia airport.

For administrative reasons the discount is calculated based on the ordinary passenger charge at each respective airport (i.e. transfer passengers will be treated as ordinary passengers for the calculation of the Flight Volume Incentive).

Flights benefiting from the New Destination Discount are not eligible for the Flight Volume Incentive.

The program is open for all airlines and applies at all Swedavia's 10 airports.

¹ Valid from January 1st, 2026.

Swedavia reserves the right to develop additional regulations to ensure that the overall purpose of the Swedavia Incentive Program is achieved. Swedavia reserves the right to change the Flight Volume Incentive in case of a decision or resolution of any Swedish, or international, Authority or Tribunal changing the conditions and/or possibilities for Swedavia to apply the above-described Flight Volume Incentive.

Any dispute arising in connection with the volume discount shall be settled in a Swedish court under Swedish law. Contact your Key Account Manager for more information or send an email to aviationbusiness@swedavia.se.
